

PV SYSTEM EXPO

5th Int'l Photovoltaic Power Generation System Expo

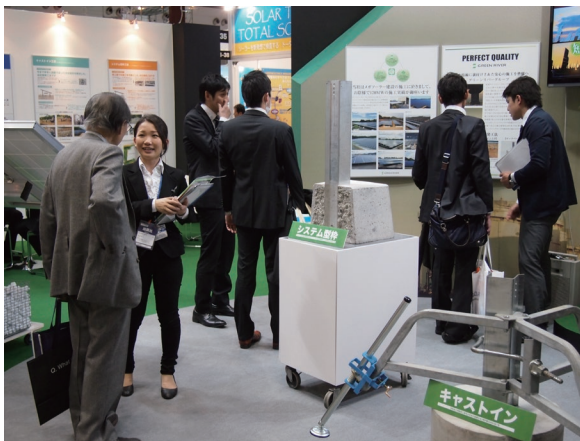

**Exhibition
report**

26th - 28th in February of 2014

It exhibited to the fifth time of smart energy Week 2014 photovoltaic power generation system expo exhibition held with Tokyo Big Sight, Japan

Content of exhibition

Introduction and PR of the system formwork and the Cast In where new item, putting basic system ROCK BASE, and the patent that our company developed were acquired were mainly progressed.

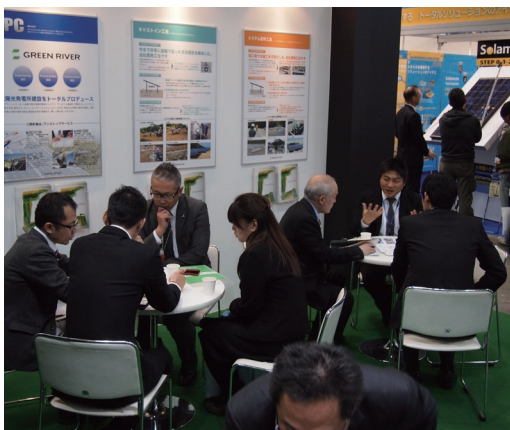

The material of our development industrial method was chiefly exhibited, and I explained while seeing the thing. It was interested in not only Japan but also those from foreign countries who came, and I was allowed to talk about a lot of matters.

A lot of those who came learnt our company because a large monitor threw the image of the promotional film and our development industrial method with the impact, and the industrial method was able to be understood plainly.

Effect of exhibition

It ended for three days large flourishing and in. Thank you indeed for many people' coming in spite of a busy schedule. The matter of 100MW or more is gotten, and new item ROCK BASE also has the expectation of 10MW or more in all.

Corporate efforts will be piled to do a better proposal in the future. Please continue your favors toward the degree that is guided, and encouraged in the future.
